

# Atlas of tropical elliptic curves

Laura Casabella

Lars Kastner

Raluca Vlad

June 17, 2025

This document contains additional data for the paper *Tropical elliptic curves in 3-space* by L. Casabella, L. Kastner, and R. Vlad (arxiv link).

## Contents

<b>I</b>	1	0	1	1	0
<b>i</b>	0	1	1	1	0
<b>J</b>	1	0	2	0	0
<b>j</b>	0	1	2	0	0

We will use these labels  $A, \dots, J$  and  $a, \dots, j$  to write triangulations of  $C(2\Delta_3, 2\Delta_3)$  in compact format.

## 1.2 ID

The ID of a graph runs from 0 to 4,008 and records its place in our list.

## 1 Documentation

### 1.1 Point configuration

We are working with the lattice points of the Cayley polytope  $C(2\Delta_3, 2\Delta_3)$ , which are given by the

### 1.3 Members in class

The number of “members in class” records how many unimodular triangulations of the Cayley polytope  $C(2\Delta_3, 2\Delta_3)$  give rise to a tropical elliptic curve in that given graph isomorphism class.

## 1.4 Triangulation

For every graph, we record one unimodular triangulation of  $C(2\Delta_3, 2\Delta_3)$  inducing it.
